

ABOUT THE STUDIO

Philosophy & Approach

Our designs are guided by an unwavering commitment to raw material integrity, local craftsmanship, and passive thermodynamic principles. Every project emerges from deep site analysis—topography, climate, solar geometry, and cultural context—resulting in architecture that is both deeply rooted and forward-looking.

Material Integrity	Passive Systems	Local Craft
We source responsibly harvested, regionally available materials wherever possible.	Every project prioritises sun, wind and thermal mass before mechanical systems.	Collaboration with local artisans preserves heritage skills and reduces transport.

TECHNICAL SPECIFICATIONS

Design Sectors

01

RESIDENTIAL DESIGN

Sumba Cliffside · Charcoal Villa

MATERIALITY

Yakisugi charred cedar facades, eco-slag foundation slabs, Low-E triple glazing

THERMO-AERO

Solar-path microclimate buffers, convective stack natural ventilation

PERFORMANCE

U-Value ≤ 0.18 W/m²K | STC 52 acoustic mitigation rating

02

COMMERCIAL WORKSPACE

Austin Office · Eco-Hub HQ

MATERIALITY

Premium cross-laminated glulam timbers, self-cleaning photocatalytic glass facades

THERMO-AERO

Smart solar louvre orientation grids, displacement underfloor air distribution

PERFORMANCE

LEED Gold certified | >75 % daylight autonomy across all occupied zones

03

BESPOKE HOSPITALITY

Ubud Wellness Sanctuary · Marine Ecolodge

MATERIALITY

Locally terraced volcanic limestone walling, structural marine composite decking

THERMO-AERO

High-mass Sumba rock thermal delay buffers, aquifer-fed cyclic greywater systems

PERFORMANCE

Ecolabel Luxury certified | STC 58 guest-tranquility acoustic rating
